

Chas Darwin Esq. F.R.S.

With the Author's kindest regards

4<sup>th</sup> Oct 1861.

Mr. G. says he has seen some notes on; he then  
he admit some slight individual variations;  
and he said 2 forms for 2 distinct  
sets of slight differences, by an called  
species. — In the same distant  
at same time, some to be similar  
varieties hardly can occur;

Notes on the forms he has  
carefully investigated — & then  
suggested to some part of  
on each set, good to  
consider the whole amount of  
further species were offered —

The state within same  
region could hardly  
vary on account of  
cuping —

All references seem have distorted. Please not stick  
out, also refer to slight variation of *Drachmolepis* -

Two small bags of the  
*Drachmolepis* species could  
be cleared up of  
specimens -
